ABOUT US

KUB inženjering d.o.o. is a privately owned company founded in 2011 in Pula (Croatia), specializing in the marine industry. We combine design, engineering and production expertise to deliver high-quality shipbuilding services.

Our experienced team manages complex projects with a focus on quality, efficiency, and timely delivery. With strong technical capabilities and a flexible approach, we meet the demands of modern shipbuilding while ensuring each project meets the highest standards.

COMPREHENSIVE, and complete design, engineering and execution solutions for marine industry.

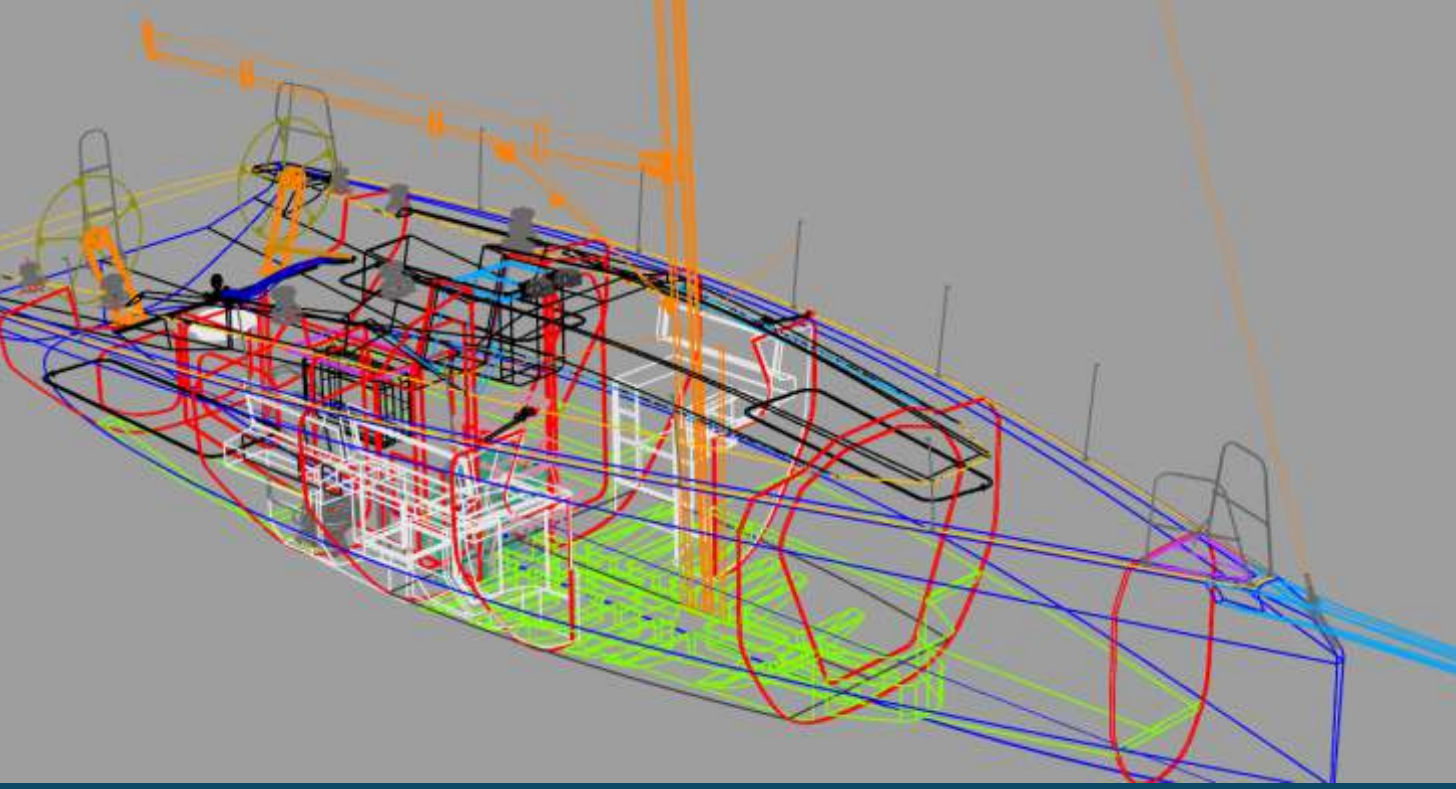

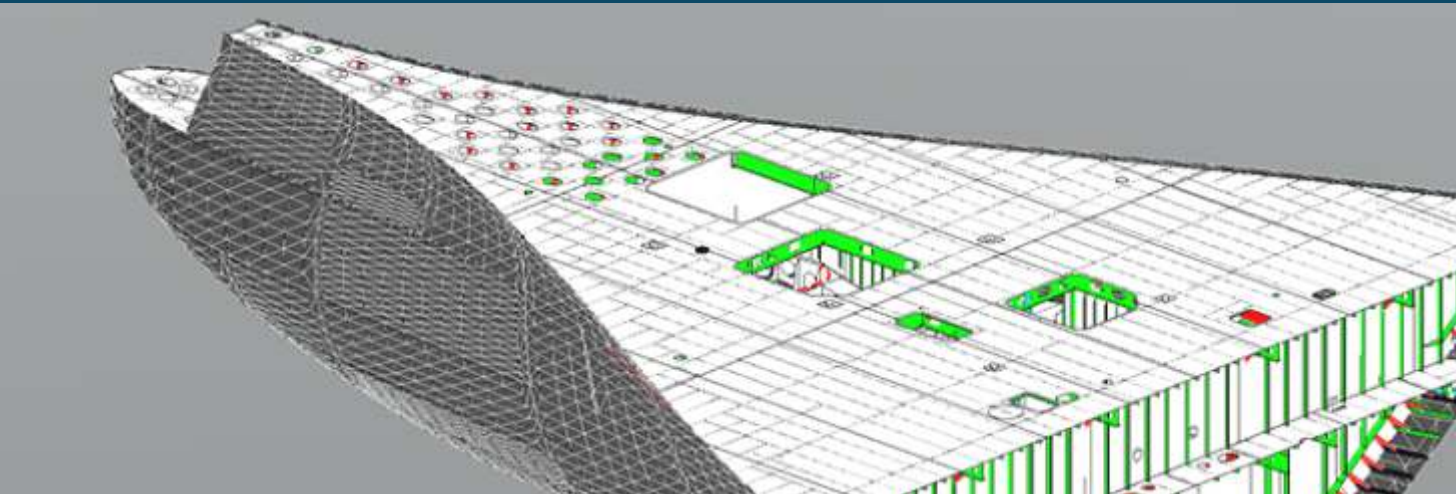

MARINE ENGINEERING

Marine engineering is our core business and it's where our team of experts offer precisely executed documentation delivered within deadlines witch is crucial for a successful production line.

- **Hull design and engineering with FEM and hydrodynamic calculations**
- **Workshop drawings complete with cutting and nesting files and curving doc.**
- **Planning and consulting regarding material lists and scheduling**
- **Ship piping systems, flow measurements and obstruction analysis**

DEDICATED *to provide smart, reliable and cost-effective marine engineering solutions.*

SHIPBUILDING & REFITTING

Our team consists of highly experienced shipbuilding professionals who have been active in the marine industry for many years. They have worked on a wide range of projects across the european shipyards, including new constructions, repairs, specialized vessels and offshore platforms.

- **New constructions projects**
- **Repairs and custom modifications**

EXPERTISE, performance and quality are guidelines where our company builds its image of a serious and trusted business partner.

YACHT DESIGN

Passion for sailing, simple lines and minimalistic design combined with years of successful work in the yacht design sector gives our designers experience and knowledge in the following fields:

- **Concept design (design proposals, proportions, ergonomics, style, etc.)**
- **Initial exterior/interior 3D geometry and presentation renderings**
- **Preparing geometry for CNC manufacturing and interior workshop drawings**
- **Presentation materials (exterior and interior photorealistic renderings)**

DESIGN RECOGNITION *IY12.98 was nominated for yacht of the year on BOTTE 2017, Dusseldorf*

OXY CRAFTS

KUB inženjering d.o.o. launched a workshop called OXY CRAFTS focused on sustainable, custom-made boats. We use marine plywood, flax fibres, carbon, and bio-epoxy to build strong, lightweight hulls without traditional moulds—reducing waste and increasing flexibility. Our composite structures resist osmosis and delamination, ensuring long-lasting performance and safety at sea.

Small boats for big fun!
